Product Description

Bad Boy 10 Series 1025 Sub-Compact Tractor w/ Loader & Backhoe

We're bringing the legendary mower deck strength found on our commercial-grade mowers to the 1025. The easy-to-mount, drive-over deck features a cutting height adjustment from 1" to 5" for a precise mowing performance. This tractor is ready to outperform anything in its class at a price that's even tougher to beat. With 25 horsepower, over 900 pounds of full lifting capacity, and our easy-to-drive automatic hydro-static transmission, it can tackle any job for small landowners. The 1025 is small enough to go where bigger tractors can't, and powerful enough to takedown any task. This sub-compact tractor can squeeze into barn stalls and through gates, so you can go even further.
