Product Description

Sno-Way 26 Series 2 Snowplow 7'6" Blade - 26SP2

Tough & Light: The Sno-Way® 26 Series 2 has all of the same standard features as our commercial snowplow line without the extra weight: High-strength steel FlexForce frame construction, heavy-duty A-frame and an ultra-responsive hydraulic package.

The 26 inch tall blades are available in 6'8" and 7'6" lengths with custom drilled top rail designed to accept the patented EZ-Fit Snow Deflector. The high strength steel blade on the Sno-Way® 26 series is kept looking good and slick with the Triple-Coat Protection; zinc phosphate wash, automotive E-Coat primer and military grade powder coat combination. The Triple-Coat Protection System delivers a surface that is resistant to penetration by salt, sand, stones or any other aggregate material.

With the optional Down Pressure® Hydraulic System, this snowplow will clean better and cut 30% of your plowing time. The Down Pressure® Hydraulics add over 250 pounds of down-force on the cutting edge which is a first in the industry and scrapes clean forward and maximizes back dragging.
