Product Description

SnowEx SS-4000 Rotary Broom - SS4000RB

Elevate your sidewalk snow removal services with the SnowEx® SS-4000 Rotary Broom. This quick and efficient solution to snow removal combines a sweeper and plow into one self-propelled walk-behind unit so you can tackle hard-to-reach areas with ease and speed. The centrally driven broom allows operators to confidently work right up against curbs, walls, and other obstacles from either the left or right side. Designed to clear long sidewalks and pathways in challenging winter weather, this machine dramatically boosts clearing efficiency for sidewalk crews.
