Product Description

SnowEx Power Pusher Trace Edge Plow

When you commit to clearing a lot, your clients expect to see pavement. The SnowEx® POWER PUSHER™ fixed wing pusher plow is your go-to for maximum efficiency with zero fuss. This pusher moves massive amounts of snow and scrapes down to the pavement, so you can save time and money on salting. Its TRACE™ edge technically allows its independent 2-foot sections to follow the contours of the pavement to remove as much snow as possible with every pass. A simple, fixed-wing design means you can clear lots fast with limited moving parts to strand you in the early morning hours.

- Blade Width: 8', 10', 12', 14' & 16'
 - Fits: Skid-Steers, Tractors & Wheel Loaders
 - Moldboard: Powder-Coated Steel
-
